**Date** – 24 June 2024 – 5 July 2024

— **Remaining work**
Number of issues left to complete this sprint

— **Guideline**
Ideal burn rate

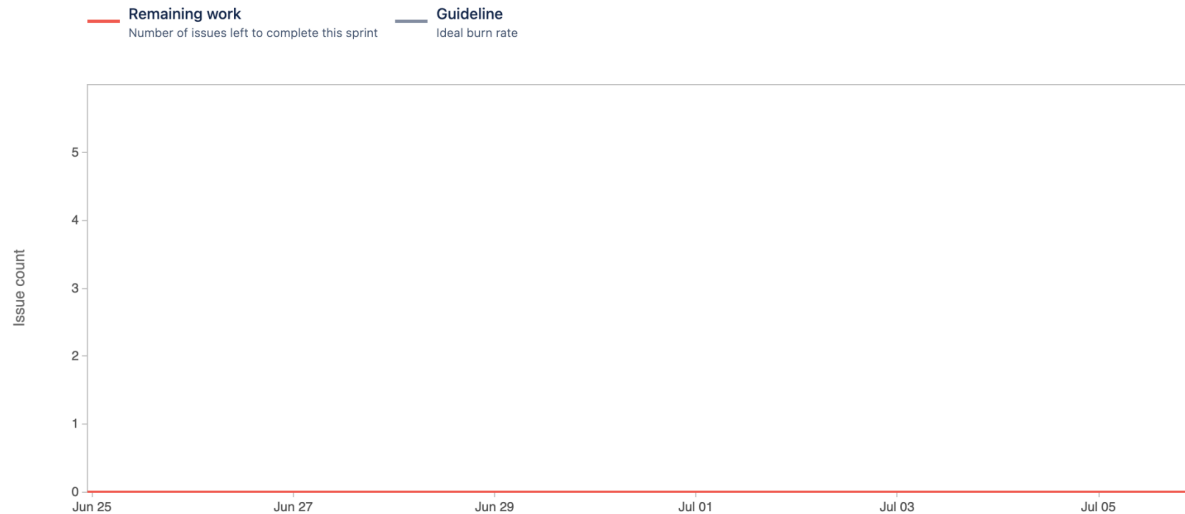

Explanation:

We completed the majority of tickets for this sprint without leaving any issues left over. However we did have a couple of tickets that carried on into the next sprint. As some team members were busy with midterms this week, most team members completed their work towards the end of the sprint. We weren't able to view the difference between planned velocity from sprint1 and sprint 2 as our Jira wasn't correctly configured for this setting.
